### **Forum Support**

All of our products accompany with free support, as we have a dedicated forum to handle your requests. Support is limited to questions regarding the theme's features or problems with the theme. We are unable to provide support for code customization or third-party plugins. However, we may help you to do some minor customizations. Particularly, we really appreciate if you have any suggestion to improve our product quality.

Please go to our support system: <http://linethemes.ticksy.com/>

# THEME INSTALLATION

---

Once you've downloaded the installation file on ThemeForest, extract it and locate a file called **Royal.zip**. You can install the theme by using one of two installation methods:

## Install by WordPress Theme Manager

This is probably the simplest way for most users. Here are 6 steps you need to take:

1. Login to your Admin page.
2. Navigate to **Appearance > Themes**.
3. Click **Add New**
4. Then click **Upload Theme**
5. Next, browse to the zip file and click Install now so the theme can be uploaded and installed.
6. After done installing, click **Activate** to publish the theme

## Install through FTP upload

If you want to install via FTP, here are 3 steps you need to take:

1. Using FTP client, login to the server where your WordPress website is hosted
2. Using FTP client, navigate to the **/wp-content/themes/** directory under your WordPress website's root directory
3. Using FTP client, upload the Royal directory to themes directory on remote server

Once installation is complete, your Royal theme will be ready to use.

## Install Plugins

After activating the theme, you will be asked to install the required and recommended plugins, you can proceed by clicking on **Begin installing plugins**

In the next page, check all the plugins that you want to install then on the drop down **Bulk Actions**, choose **Install** then click **Apply**, the plugin installation process will start.

After install plugins, go to **Appearance > Install Plugins**, check all the plugins that you want to activate then on the drop down **Bulk Actions**, choose **Activate** and click **Apply**, the plugin activation process will start. Wait for all the plugin activated then you can start customizing your website as you want

## Install Sample Data

Go to **Appearance > Import Demo Data**, on the next page, then click to the import button to start import process.

everything instead of creating content from scratch.

When you import the data, the following things might happen:

- No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified.
- Posts, pages, images, widgets, menus and other theme settings will get imported.
- Please click on the Import button only once and wait, it can take a couple of minutes.

**Demo #1** **Import**

**Demo #2** **Import**
